## GERMAN SUPER-SUBMARINE ARRIVES IN BALTIMORE

Carries Cargo of Dyestuffs Valued at Million Dollars Across Ocean

### EPOCH-MAKING TRIP STARTLES THE EAST

Strictly a Merchant Vessel Without a Gun or Any Weapons Aboard to Detain it

(By Associated Press.)  
NORFOLK, Va., July 10.—The German submarine Deutschland arrived at 1:45 a. m. Sunday. The boat was met by a tug and proceeded at 4:45 a. m. to Baltimore, piloted by Captain Cooke. The submarine, which left a German port June 23, is commanded by Captain Kairig and carries a crew of 29 men, besides a cargo of 1000 tons, a quantity of mail and a message from the emperor to President Wilson. The pilot said the submarine was unarmed. A coast guard cutter is guarding the stranger.

(By Associated Press.)  
BALTIMORE, Md., July 10.—The German submarine consigned to A. Schumacher & Co., Baltimore, carries dye stuffs and medicine. The gigantic German merchant submarine docked here at a pier on the outskirts of the harbor early this morning, thus ending a history making voyage. Definite announcement was made that she will be the first of a fleet of underwater liners built specially for the transatlantic trade by Captain Paul Koenig, her master.

One thing noted by the boarding officers was that there were no torpedo tubes or guns of other kind aboard and that the vessel was totally unarmed. The officers and men all wear regulation German merchant marine uniforms.

The Deutschland is described by a health officer as a mass of machinery. It has a kitchen like a Pullman diner. Everything is metal inside, and compact. The officer declares the vessel has no guns or torpedo tubes. The periscope is exceedingly efficient.

The captain said he carried no letter from the Kaiser to Wilson. He said his vessel would be followed by the Bremen shortly, all of which are privately owned. His boat, he said, had a displacement of 2000 tons and a speed of fourteen knots. He declared he was on an entirely peaceful mission. He said he came on a straight course and was not forced to deviate by warships, as it was easier to submerge, which he did often. The ship, he said, can carry 1000 tons of cargo and on this trip had 750 tons of dyestuffs valued at \$1,000,000. The charges for this shipment alone, he said, would pay for the cost of the Deutschland, or about \$500,000.

(By Associated Press.)  
WASHINGTON, July 10.—Both British and French embassies have officially called the attention of the State department to the arrival of the Deutschland, the super-submarine, and asked the United States to assure itself of the character of the vessel. It was announced today that navy experts will assist the Treasury department to make an examination.

### SERVING MEXICO WITHOUT FORCE

PRESIDENT WILSON INTIMATES THAT INTERESTS WANT TO EXPLOIT NEIGHBOR

(By Associated Press.)  
DETROIT, July 10.—President Wilson, in speaking here to sales managers, urged business men to carry justice and fair dealing into the ports of the world, especially those of Mexico. "My efforts," he said, "will be to serve all America by serving Mexico better, for the best interests without using force and not to serve a few 'gentlemen' wishing to exploit our Mexican possessions."

### Pay Roll Keeps Up With The Increase of Employees

It is customary following the July 4th celebration for merchants to complain of a shortage of money in circulation, but this was not the case in Tonopah today, as the pay check went its merry rounds with undiminished vigor. The money was visible and, as everybody knows, there was no deficiency on the national holiday when the amount of specie placed in circulation was even greater than at any time in the experience of the camp. The entire sum paid out today, including mine

#### INJURED MAN GOES TO COAST TO RECOVER FROM SHOCK

Ed. Betlach, of the T. & G. market staff, was a passenger this morning for the coast, where he goes to complete recovery from injuries sustained when he was struck by a motorcycle training for the Fourth of July race. Mr. Betlach is almost recovered but thinks a short rest at a lower altitude will improve his physical condition.

#### TONOPAH MINING SCHOOL CLOSES FOR THE SEASON

The Tonopah School of Mines closed last Friday afternoon, to reopen on September 4 for the fall term. The school is growing more popular every day and it is predicted that there will be a large increase in the attendance next term.

### Pay Roll Keeps Up With The Increase of Employees

payrolls and supply accounts, was over \$410,000. The aggregate was less than the previous month, since there was not so much construction or installation going on, but this decrease was partially met by an increase in the number of men employed. The leading companies say they are getting back to their normal number of employees, as the daily arrivals include many old timers who have drifted back from the southern country, where working conditions are not of the best and the climate is almost as bad as at Yuma.

### VILLA BANDITS NEARING TEXAS

#### MEXICAN MINISTER WARNS THE UNITED STATES OF FEARED RAID ON THE BORDER

(By Associated Press.)  
WASHINGTON, July 10.—A second warning that the Villa bandits are heading for the Big Bend district of Texas was given Secretary of State Lansing by Minister Arredondo, who said his government was given definite information that the bandits were coming toward Boquillas, Texas. He promised the co-operation of the Carranza forces.

### WHITE CAPS ASSAYS SHOW IMPROVEMENT

#### HIGHER VALUES ON THE LOWER LEVEL AND ONE AMENABLE TO FLOTATION PROCESS

The east crosscut on the 310 level of the White Caps is still in the vein with no sign of the wall. The first four feet averaged \$17.20. No report on values further in on the ledge has been received, except that apparently they are fully sustained. Inasmuch as on the 210 level the vein ran only \$14.60 a ton, the significance of the strike is apparent.

The west crosscut should reach the main, or shaft, vein in less than two weeks. The ore on the 310 seems amenable to the treatment found successful on the ore above and no time will be lost in getting the mill in operation.

### OPENING ARGUMENT IN THE ORPET CASE

#### STATE CONTENTS DEFENDANT'S CONDUCT WENT TO PROVE HIS INTENTION TO MURDER GIRL

(By Associated Press.)  
WAUKESHA, Ill., July 10.—Eugene M. Runyard, in his opening argument in the Orpet trial, said Orpet was a youth of no character, vain and selfish. He said the motives for the murder were plain. He declared the girl went to the woods meeting place not prepared to commit suicide, while Orpet's movements bore every imprint of an elaborate plot to escape the consequences of the crime on which he was bent.

### BAND CHASED INTO DURANGO MOUNTAINS

#### FIFTEEN HUNDRED MEN TURNED AWAY FROM BORDER AND CHASED INTO CANYONS

(By Associated Press.)  
EL PASO, July 10.—Gen. Matias Ramos has pursued a Villista band under Contreras into the Durango mountains, according to a telegram from Gen. Trevino. He said the Villistas did not give battle at Las Nuevas as expected, but continued to Rio Florido. Ramos has 1500 men under him.

J. J. McQUILLAN, the postmaster, was a passenger yesterday morning for San Francisco.

### A REPUBLICAN PRESIDENT NEEDS REPUBLICAN SENATE TO BACK HIM

Sam Platt, candidate for the United States senatorship, who ran a neck and neck race with Senator Newlands two years ago, spent yesterday in Tonopah. He said to a Bonanza representative:

"This is my second visit to Tonopah in the past six weeks and I am delighted to note the prosperous conditions here and the splendid prospects for the future years. The known ore zone is being extended to both the east and west and the permanency of the district, I am confident, is fully assured."

"Since my return from Chicago, where I had the honor of being a delegate to the National Republican convention, and my subsequent visit to New York and other large eastern cities, I am filled with enthusiasm over the prospects for the election

of Mr. Hughes. His nomination by the convention has brought together all conflicting interests and the east is alive to the fact that the Republicans, Progressives and many Democrats, who are strong for the assertion of American rights and for the upholding of American honor, are ready and anxious to join in the election of Hughes by the greatest majority ever given any candidate for the presidency. He is a man of high attainments and possesses a commanding, genial and warm personality. He is justly celebrated on account of the two successful campaigns he made for the governorship of New York, as being one of the greatest platform orators in the country.

"I have already taken preliminary

(Continued on Page 4.)

### LOOTS FOUNDRY LEAVES BOOTY

#### POLICE ANXIOUS TO FIND THE OWNER OF WAGON FILLED WITH OLD METAL

Chief of Police Evans is anxious to find the owner of a big wagon and two horses that were found Saturday morning outside the Campbell-Kelly foundry. It is a lucky thing for the foundry that the wagon was discovered, for examination disclosed that it was filled to capacity with aluminum castings, bushings, rabbit metal and steel billets. The robbery and recovery were the result of an accident, or rather the kindness of some of the employees.

It is customary for the first man to arrive in the morning a few minutes before 8 o'clock. Saturday morning he came at 7 o'clock, but failed to observe anything unusual except the presence of a team and wagon outside the gate. The team stood there two hours later, when one of the men suggested that it was cruel to leave the poor animals exposed to the burning sun without water, and an attempt was made to find something about the vehicle that would give a clue to the owner. Imagine the consternation of the investigators on finding the vehicle filled with loot taken from the foundry. There was no trouble about identifying the goods. The thief is supposed to have been busy inside the foundry as the man arrived and made his departure through another exit. The owner is well known, but the police have not succeeded in finding him at any of his usual haunts, so it is surmised he is beating it.

The fugitive has been suspected for some time of crooked work, but the officers have never succeeded in getting the evidence.

### BIG 12 CYLINDER CAR PASSES THROUGH HERE

#### FINEST CAR EVER SEEN IN TONOPAH TRAVELING FROM SAN DIEGO TO NEW YORK

The largest machine ever seen in Tonopah, a 12 cylinder Pathfinder, equipped with Goodyear Silverton cord tires, passed through here early this morning on the way to New York City. Walter Weideley and "Heine" Scholler started from San Diego Saturday morning and are traveling on the Midland trail from San Francisco to the east, hoping to establish a record. The low and second gears are locked and sealed by the American Automobile association, handicapping the machine and forcing the party to drive the car the total distance on the high.

### WATCHING PLAGUE ON THE COAST

#### THREE STATES UNITE TO SAFEGUARD THEIR CITIZENS FROM THE EASTERN EPIDEMIC

(By Associated Press.)  
SAN FRANCISCO, July 10.—All three coast states are taking precautionary measures against the spread and introduction of infantile paralysis. All health officers are active. No additional cases are reported, but all incoming passenger trains are inspected.

(By Associated Press.)  
NEW YORK, July 10.—Dr. Haven Emerson, health commissioner, said last night that while the rate of increase in patients had been lowered there had been no constant decrease thus far, and that it could not be said the epidemic was under control.

The chief problem now confronting the health department officials is the danger to the general public of the "carrier," a child or adult who may have the disease and, without being aware of the fact or showing symptoms of it, can communicate to others. It is hoped by experiments on monkeys to determine how the disease is spread. They had proved in the past more valuable than any other animal for research work.

Six new cases were reported yesterday in Newark, N. J., and the disease has appeared in many other nearby places.

### WESTERN PACIFIC PLANS RENO LINE

#### RENO LIKELY TO HAVE ANOTHER RAILROAD TRUNK LINE BY OPENING OF NEXT SUMMER

The Western Pacific is said to be contemplating extending its line to Reno. At present the Verdi Lumber company's road connects with the Boca and Loyaltan at a point near Davies, in Sierra county, Cal., and in order to make a through line it will only be necessary to build 10 miles from Verdi to Reno.

For several years large tracts of virgin timber lands close to the Western Pacific railway have been quietly acquired, until today the Verdi company has immense holdings in that locality. At first it was the intention of the management to build and equip another plant along the Western Pacific similar to the one now in operation at Verdi, but a survey of the lands acquired indicates that the bulk of the timber holdings are much closer to Western than Southern Pacific rails, and there is a well founded rumor that the lumber company will move the saw-mill, box factory, planing mill and machine shops to a site already

### VICTORY IN PICARDY CLAIMED BY BOTH

British Assert Great Gains Scored While Germans Insist They Recovered Lost Ground

(By Associated Press.)  
LONDON, July 10.—British troops have made a new advance northwest of Contalmaison and north of the Somme, according to an official report. Some guns and additional prisoners were captured. A gain was scored through the capture of a small wood. In the last forty-eight hours particularly sharp fighting was centered in Trones wood, which is of triangular shape and defended by the Germans with a series of trenches and wire entanglements. Yesterday counter attacks by the Germans were crushed by artillery. In the five fruitless attempts the Germans made they lost heavily in killed and wounded.

(By Associated Press.)  
BERLIN, July 10.—The capture of Trones wood, Lamaisonette farm and the village of Barleux by the German attacks on the British lines is announced in an official message. Fighting on both sides of the Somme is continuous. The Germans have repeatedly repulsed the enemy while storming their positions. Temporarily they were forced to give ground, but later ejected the assaulting force. Between Barleux and Belloy off repeated attacks have broken down completely. The British lost heavily.

(By Associated Press.)  
PARIS, July 10.—A new attack launched by the French resulted in the capture of a front of 500 meters of trenches. On the Somme Front the French took a line of German positions near Barleux. Two hundred prisoners were taken. The Germans made five simultaneous attacks in the Vosges which were completely checked by French machine guns.

### YAQUI INDIANS GROW RESTIVE

#### ABOUT FOUR THOUSAND SAVAGE FIGHTERS FROM MOUNTAINS OF SONORA TO BE FACED

(By Associated Press.)  
GUAYMAS, Sonora, Mexico, July 10.—Reports from outlying districts indicate renewed activity on the part of the Yaqui Indians. This has been anticipated by those familiar with conditions in Sonora because the campaign inaugurated by the de facto government in January for the purpose of ridding the country of the Yaquis has not as yet been a success.

Approximately eleven thousand troops were mobilized under General Dieguez to drive the Indians from their strongholds in the Bacatebete mountains, but the soldiers were poorly equipped for the undertaking. They lacked discipline, organization and spirit, and although the Mexican government may have desired an aggressive campaign the local leaders and men had no intention of taking the offensive against the savages, whose fighting ability is well known throughout the Republic. Like the Apache tribes of Arizona the Yaquis have committed the most fiendish atrocities. For this reason the troops fear to operate against the warriors. The strength of the Indians is not accurately known, but is estimated as being about ten thousand, of which approximately four thousand are well armed fighting men. This force generally operates in bands of fifty to one hundred or more, which make swift and unexpected raids upon outlying ranches and villages during the harvest season and at other times if their food supply happens to run low, as is the case at the present time. Spies are maintained throughout the farming districts who keep the tribe well informed and assist in the raids.

EDDIE MEAD, of the Cash Boy, left yesterday morning for San Francisco. selected on the main line of the Western Pacific railway.

### CHINESE CARPENTERS HIRED BY ENGLISH

#### YELLOW MENACE ESPECIALLY ADEPT IN CONSTRUCTION OF ALL TEMPORARY WORK

(By Associated Press.)  
HONGKONG, July 10.—Chinese carpenters have been sent in large numbers from India to work with the English expeditionary force in Mesopotamia. Officers at Rangoon received special instructions to employ Chinese carpenters for work with the English military forces, because of their great skill in building all sorts of temporary shelters and bridges.

Russia has drawn upon China for large numbers of laborers to work in Siberian mines, to build railways and replace white labor in agricultural districts robbed of their men by the war, and France has also drawn upon China for agricultural labor.

ALBERT C. OCHS, of San Francisco, representing the Flak Rubber company, is in Tonopah today looking after the tire business of this district.
